

Cisco Operations and Troubleshooting Bootcamp for ACI

Intensive training in ACI

The **Cisco Operations and Troubleshooting Bootcamp for ACI** is a rigorous Application Centric Infrastructure (ACI) training program for teams of up to 12 learners, led by Cisco ACI® experts and tailored to your team's skills and goals. Your bootcamp includes 9 days of in-depth training delivered over an 8-week period. Here's how the process works:

- You meet with Cisco® experts so we can assess your training needs
- We deliver 5 days of real-time instructor-led training
- Your team participates in self-paced e-learning to solidify their learning
- Our experts facilitate a 4-day deep-dive lab
- Your team can also receive expert coaching to supplement their learning
- Learners earn Continuing Education credits after completion of instructor-led training and deep-dive lab that can be used toward recertification

After learning and creating with this hands-on curriculum, your team can get back to the business of automating and innovating, applying their newfound knowledge to optimize your network.

What your bootcamp covers

In your 5-day instructor-led class

You'll work with Cisco ACI experts on topics specific to your situation, such as:

- Introduction to ACI
 - Cisco ACI fabric infrastructure and basic concepts, Cisco ACI policy model logical constructs and basic packet forwarding and configuring and managing external network connectivity
- ACI Operations
 - ACI configuration management, monitoring, and troubleshooting

In your 4-day deep-dive lab

You'll extend the skills you gained in the 5-day class by performing complete ACI implementation tasks. You will build an ACI fabric and then solve common issues using troubleshooting use cases.

- Gain immersive experience with technologies such as ACI Multisite, ACI Multi-Pod, hypervisor integration, and more
- Troubleshoot ACI issues with common problems and real-world scenarios
- Collaborate with your team to solve complex ACI configuration problems

Continuing Education credits

- 50 Continuing Education credits earned for completion of instructor-led training
- 32 Continuing Education credits earned for completion of deep-dive lab
