# Troubleshoot Hybrid Calendar - Password Has Expired or Invalid

### Contents

Introduction Prerequisites Requirements Components Used Symptom Expressway-C GUI Webex Control Hub UI Troubleshoot Solution Reboot the Expressway Server to apply the change inmediatly Validate the alarm cleared from Webex Control Hub UI Expressways on Clusters References

### Introduction

This document describes the remediation of Expressway Connector with the alarm Webex Meetings site administrator password has expired or invalid.

# Prerequisites

#### Requirements

Cisco recommends that you have knowledge of these topics:

- Webex Control Hub Organization.
- Hybrid Calendar with Exchange service.
- Expressway Connector (X12.5 at a minimum for new deployments)
- Supported Versions of Expressway for Webex Hybrid Services Connectors

#### **Components Used**

The information in this document is based on these software and hardware versions:

- Hybrid Calendar activated. In this guide, use Hybrid Calendar with Exchange.
- Exchange Server 2019 Standard.
- Expressway-C X14.0.5.

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is

live, ensure that you understand the potential impact of any command.

# Symptom

#### **Expressway-C GUI**

Navigate to Status > Alarms.
