Set Language on a Cisco IP Phone 8800 Series Multiplatform Phone

Objective

This article aims to show you how to set your preferred language on the Cisco IP Phone 8800 Series Multiplatform through its web-based utility and phone GUI.

Applicable Devices | Firmware Version

• 8800 Series | 11.0.1 (Download latest)

Set Language - Through the Web-based Utility

Step 1. Log in to the web-based utility of the IP phone and click **Admin Login > advanced**.

Admin Login	basic	advanced

Step 2. Click Voice > Regional.

Call History	Personal Dire	ectory
Provisionin	g Regional	Phone
	Provisionin	Provisioning Regional

Step 3. Enter the language you prefer in the *Language Selection* field under the Language area.

Note: In this example, English is used.

Language	
Dictionary Server Script:	
Language Selection:	English

Step 4. Click Submit All Changes.

You should now have successfully set the language on your phone through the web-based utility.

Set Language - Through the Phone GUI

Step 1. Press the **Applications** button on the IP Phone.

Step 2. Using the Navigation cluster button, navigate to **Device administration** then press the **Select** softkey.

Step 3. Navigate to Language and then press the Select softkey.

		Administration		
	1	Set password	>	
	2	Sign out		
	3	Date/Time	>	
C	4	Language	English-US>	
	5	Restart		
		Select		

Step 4. Choose the language and then press the **Save** softkey.

Note: In this example, English-US is chosen.

	Language selection	
ſ	English-US	
	_	-
	Save	

You should now have successfully set the language on your phone through the GUI.
